

Anker Maritime Managed Services

Our versatile and readily accessible Anker Maritime Managed Services portfolio offers unique VSAT service levels on Ka-band and Ku-band.

We can accommodate seasonal flexibility and meet short-term service demand, offering standard pre-packaged service profiles, as well as tailored solutions to meet specific customer needs and operational requirements of any vessel.

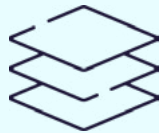

Anker is available in three service packages: Speed, Quota and Custom.

Speed

A speed-based service profile is ideal for users requiring a high-quality connection and fixed monthly service charges.

- Up to 30/10 Mbps profiles
- Guaranteed CIR with burstable MIR
- Fixed monthly rate

Quota

Quota is ideal for both entry level users requiring a low monthly service charge and sporadic users requiring high speeds and predictable costs.

- Volume plans from 5-200 GB
- Top-up packages available
- Notification for reached 50% and 90% of quota limit

Custom

Custom provides full flexibility, and the possibility to create a profile suitable to meet individual requirements with custom rate-based service profiles.

- Symmetric / asymmetric profiles
- Wide selection of contention rates
- Fixed monthly rate

Our THOR fleet of satellites provides coverage with an excellent look angle across all Pan-European maritime shipping routes together with extended coverage over the Atlantic, Western Africa and the Caribbean.

For more information, contact your KAM or our team at dataservices@telenor.com

Anker Ka-band features:

- Coverage: pan-European, up to 79° North
- High Throughput Satellite (HTS)
 - High-powered spot-beam technology
 - Seamless handover for continuous connectivity
 - Sophisticated rain fade mitigation techniques
- VSAT platforms:
 - iDirect Velocity®
 - Newtec Dialog®
- Service profiles:
 - From 512/128 kbps to 150/50 Mbps
 - Fixed monthly rates with unlimited data
 - Affordable, flexible pre-paid data packages
- Symmetric / asymmetric profiles
- Flexible service terms:
 - Increased profiles during peak periods
 - Short-term tailored contracts
 - Lay-up periods
- Tailored IP configurations
- XipLink™ WAN optimisation
- Supported antennas range from 55cm to 1,5m
- Dual antenna solution
- Antenna financing solutions
- One-touch commissioning
- 24/7/365 technical support

Anker Ku-band features:

- Coverage: pan-European, up to 79° North
- Extended coverage: North Atlantic, the Caribbean and West Africa
- VSAT platforms:
 - iDirect Velocity®
 - Newtec Dialog®
- Service profiles:
 - From 512/128 kbps to 100/20 Mbps
 - Fixed monthly rates with unlimited data
- Tailored SCPC and "Carrier in Carrier" solutions
- Flexible service terms:
 - Increased profiles during peak periods
 - Short-term tailored contracts
 - Lay-up periods
- Tailored IP configurations
- XipLink™ WAN optimisation
- Secondary beam for extended coverage or mast blockage
- Supported antennas range from 60cm to 2,4m
- Dual antenna solution
- 24/7/365 technical support
